

Amidst stellar vistas, an orb of night gleamed,
A cosmic yarn, in brilliance it beamed.

The cat, entranced by its' celestial allure,
Embarked on a quest, a cosmic detour.

In this enchanting realm, the cat mused in delight;
Its warm radiance beckons sweet dreams in the night.

With a shimmering texture, an invitation to play,
On this sacred sphere, freedom reigns, no humans in the way!

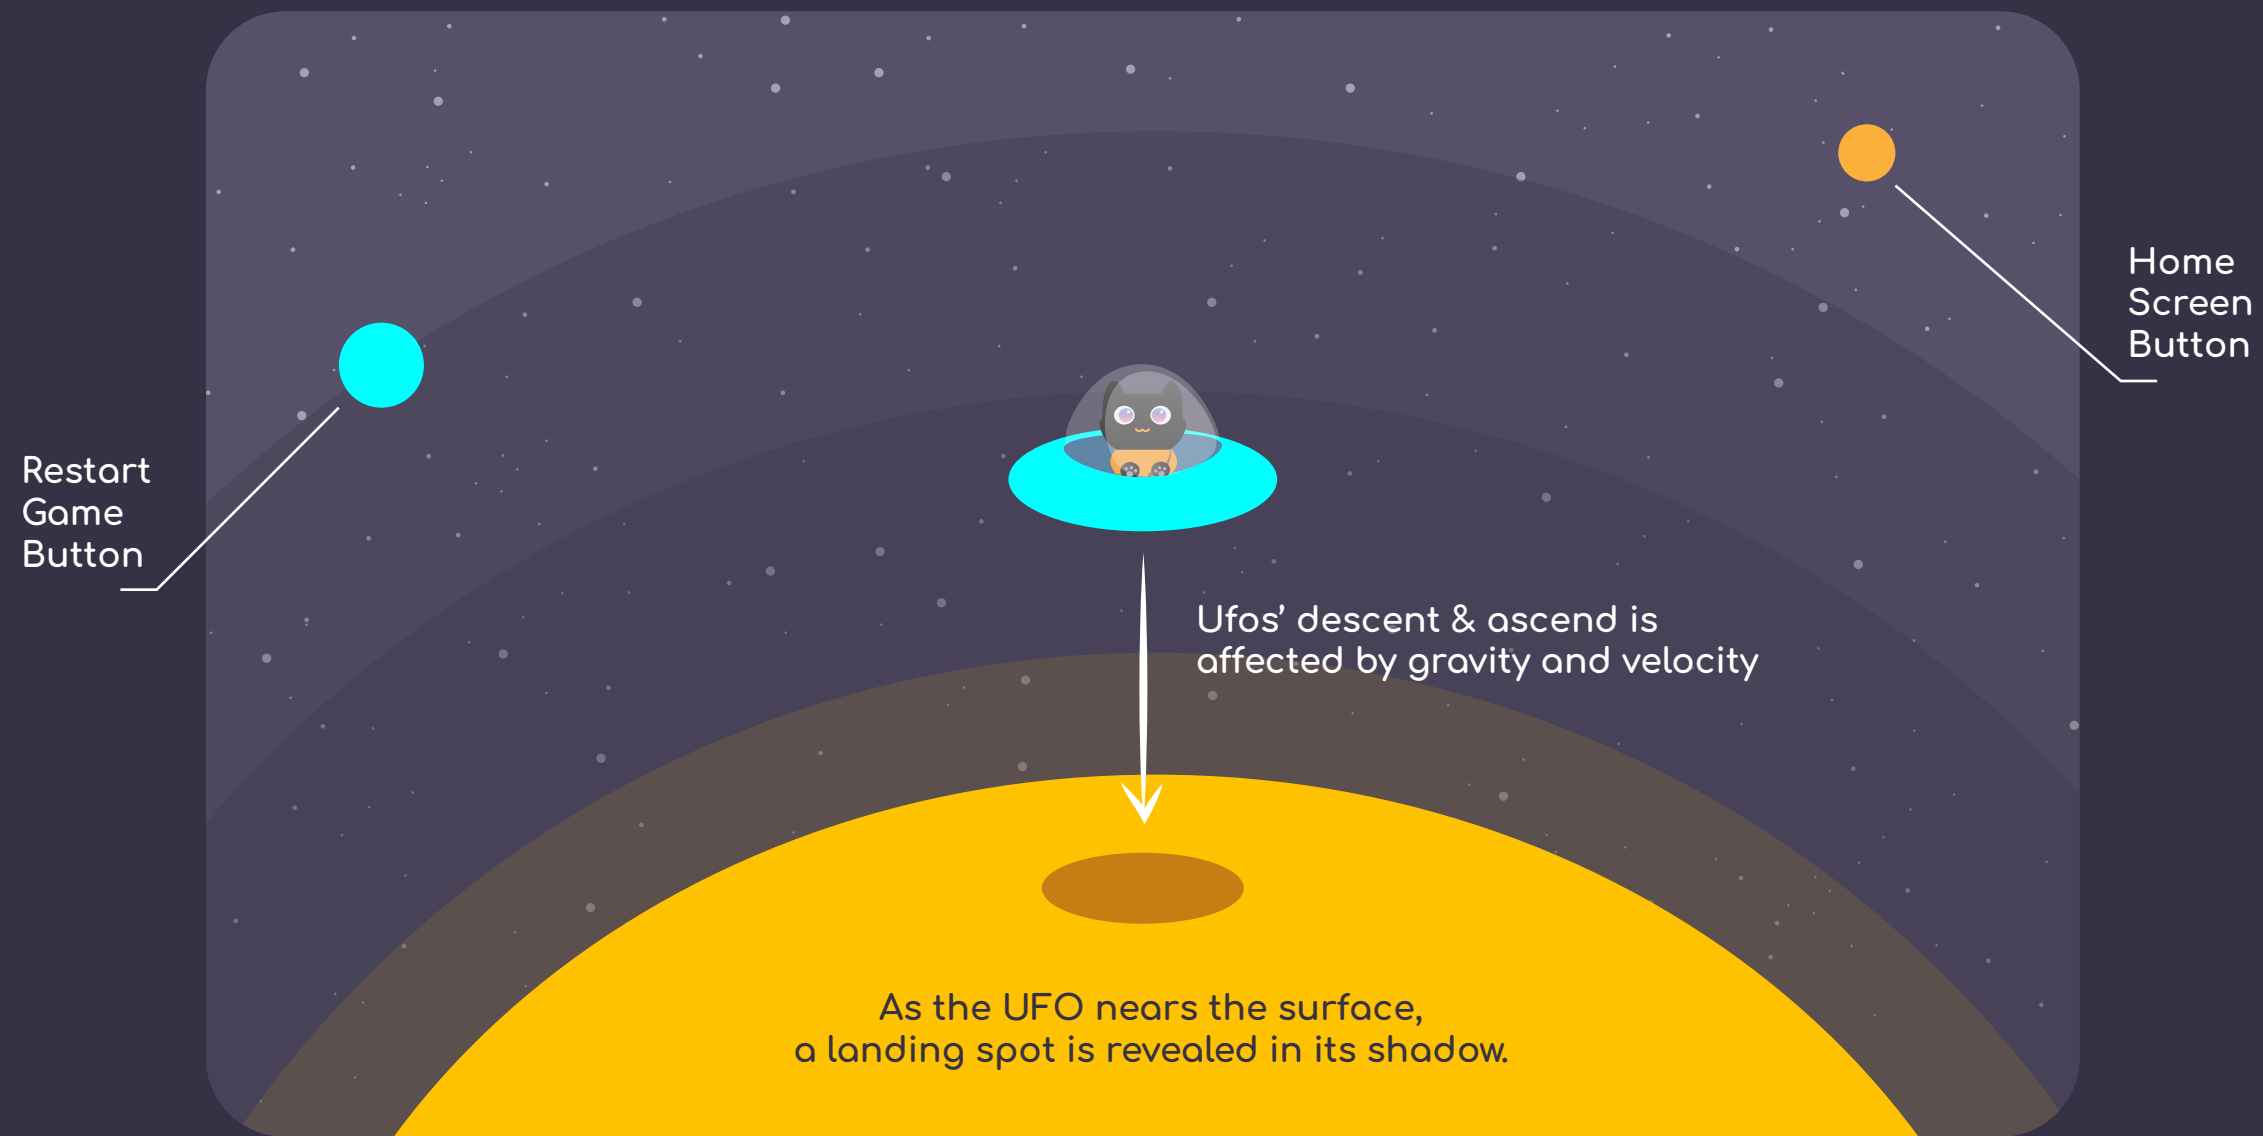

So it took its' tiny helmet & crafted a ship with care,
Paws clutching levers, navigating through cosmic air.

It may miscalculated the hassle with the landing,
please provide help with your understanding!

Hint:
SPACE

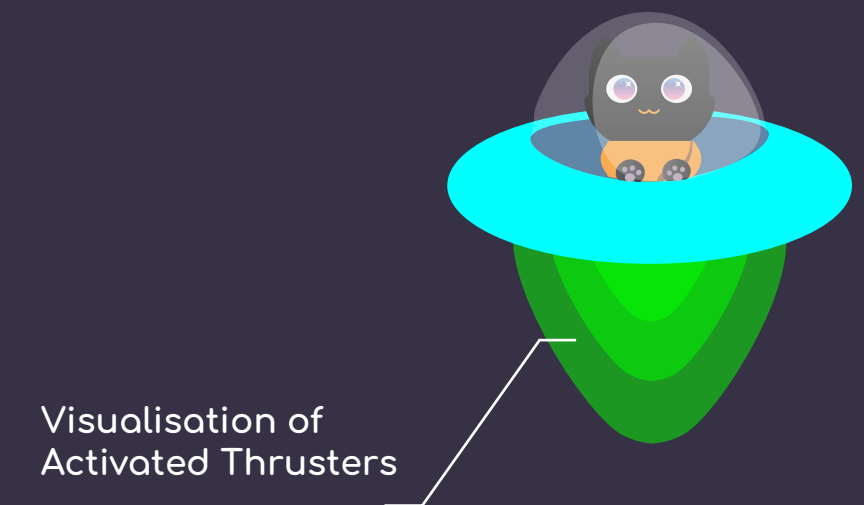

OBJECTIVE:

Prevent the UFO from descending too rapidly onto the planet's surface.

This is determined by calculating the **velocity speed** of the UFO as it approaches the final destination.

Upon a flawless landing or a crash, a corresponding message will be revealed.

SPACE BAR BUTTON

MOUSE
BUTTON

Pressing either of these two buttons will start the game. These buttons also serve as keys to activate the UFO's "thrusters," enabling acceleration and upward movement of the UFO.
